Løver er dovne

Løver lever sammen i flok.
 I en love-flok er der som regel 2-4 hanner,
 10-15 hunner og deres unger.

Alle hunner er i familie med hinanden.
 De kan være søstre, kusiner,
 mødre og døtre.

Hannerne kommer udefra.
 De bliver i flokken i 2-3 år,
 så kommer der nye, stærke hanner.

En flok løver jager efter bytte-dyr
 i et stort område.
 Flokken sprøjter også duft ud i området.

Med duften fortæller de andre løver,
 at de skal holde sig væk.

Løver er ret dovne.
 De hviler og sover ca. 20 timer i døgnet.
