

Car clinic

Eleverne får udleveret et ark med tre fejlfindingsøvelser. I de tre forskellige beskrivelser er der oplysninger om bil, alder og fejlsymptomer på bilen. Eleverne skal bruge nedenstående ark til at løse en eller flere af fejlfindingsøvelserne. (Den svage elev løser måske kun en, og den stærke elev skal løse alle tre).

Fault finding and diagnosis

You have been given a piece of paper with three tasks. Every problem described is related to the brake system on a car.

You are required to choose at least one of the problems and do the following:

- Read and translate the problem description.
- Describe what you think is the cause of the problem.
- Describe how you would deal with the problem.
- How often do you see this problem at your work place?
- Your answer should be written down in a word document and put into your personal ring folder.

If you have time, continue with tasks two and three and follow the same procedure.
